Hi Tu,

Well noted and thank you for clarifying. I've updated the BOM for FW24CS008 Melange Uniform Crewneck to reflect the actual rib that was used here. Noted that we've never run a 1x1 rib. Is **2x2 #C2300246** the only UA rib that we've ever used for terry styles?

Please proceed with developing a 1x1 rib and a 2x1 rib that we can consider for future use.

Thank you!
Jeni

Hi Jeni,

Sorry for delay here.

I have checked history of FW24CS008 Melange Uniform Crewneck. The original BOM requested to use rib **2x2 #C2300246** and after we sent 1st proto sample, comments didn't mention about change to 1x1, but I saw on the construction page, not updated on BOM. Currently, bulk is using **2x2 #C2300246** for both styles, this is the reason why rib is identical between 2 styles. I attached original file and 1st proto comment for your reference.

Also, we haven't yet developed rib 1x1 for you before, so we don't have article. If you would like to use rib 1x1 on upcoming time, please let me know, I will develop right now 😊

To avoid any mistake, please mention any change on comments page, it helps me a lot. Thank you very much.

Thank You and Best Regards

Subject: UA Rib Qualities

Hi Tu,

We are actively working to complete SS25 TPs and bulk BOMs but we need some clarity regarding the rib qualities that UA has used for FW24.

For FW24CS001 Washed Unisphere Crewneck we requested UA 2x2 rib art.# C2300246 and for FW24CS008 Melange Uniform Crewneck we requested a 1x1 rib, however these appear to be identical.

Can you confirm if the actual quality that was used for these styles is 1x1 or 2x2 so that we can properly identify this going forward? Do you have a UA article # you can advise for 1x1 quality? It would be helpful if you can send us swatches of each so that we can keep on hand for easy reference.

Thank you for helping to clarify here!

Best,

Jeni
