**Subject:** RE: Seasonal Packaged Tees + Seasonal Packaged Tank Top

Hey Jeni,

1. BROs Code for the Heather Grey for Packaged Tee's - I will follow up with this tomorrow - Please can you prioritize this as the timeline is quite tight if we are trying to maintain the 1/17 XF. This is delaying BULK FABRIC Ordering.
  2. Navy Pantone for Packaged Tee's - NAVY BLAZER 19-3923 TCX, please proceed to lab dip in the updated quality – We will proceed ASAP
  3. All comments/approvals for the Packaged Tanks - The team does not feel that the weight or tension of the proposed updated quality BSL-294 RIB is comparable to our original reference. Is this the closest you can achieve? This is the best we can achieve currently but can continue to develop new options for the future, we need to make a decision on how to proceed with quality for this style by the **24<sup>th</sup> of October** to have a chance at shipping before TET as Requested. This is delaying BULK FABRIC Ordering.
- Would you and the team like to proceed with:
- (TTRIB2X2 240RIB) Previous quality from UA
  - (BSL-294) the updated quality

We will continue to develop further options for the future but for this NOS drop we need to choose from these 2 options to be able to ship before TET.

Please get back to us with this as soon as possible so we can organize how these styles will proceed and can lock in a critical path and XF.

Cheers,

Thank you and Best Regards,

CREATING AN IMPACT THAT MATTERS

Please can you review the Lab dips for FENKK00013 and advise if this is workable for future productions. Once we have final confirmation, we will be able to more accurately predict the viable Ex-factory for this style.

We have been told that once confirmed this fabric will take an estimated 50days for fabric production (we hope to improve this once confirmed).

UA have sent Lab dips for Black and White already for FENKK00013, can you please provide the necessary BROS Code for the 3<sup>rd</sup> color of Packaged Tees.

UA need confirmation on quality and color by 10/16 to be able to maintain 1/17 Ex-factory as requested.

**Seasonal Packaged Tank:**

Our Purchasing team has received and reviewed your supplied reference, we have done our best to match the quality, ideally we need ALD to receive and review the Quality provided on 10/15 with comments coming at latest Wednesday 10/16 to minimize any delay to lead time that may be affected.

I understand it will be hard to make a decision without Lab Dips, we are still waiting on these from the supplier. As this updated quality (BSL-294) is from a different supplier than previous (TTRIB2X2 240RIB) we cannot confirm that the black will be deeper but we have expressed to all suppliers that we need to achieve the darkest black possible. White and Black Lab Dips will be sent to ALD for updated Quality BSL-294 on 10/18 and ideally comments/approval from ALD will be sent by 10/22. **JF: Awaiting lab dips, will confirm upon receipt**

If we receive all comments/approvals of quality and color by 10/22 we can ship the Seasonal Packaged Tank Styles before our TET Break on **1/25**, one week later than requested.

Please let me know if you need any additional information to help make your decision on this and I will get back to you as soon as possible.

Cheers,

Thank you and Best Regards,

**Subject:** RE: Seasonal Packaged Tees + Seasonal Packaged Tank Top

Hi Jeni,

Please see my reply in **green**

**Seasonal Packaged Tee** - It looks like we should receive the lab dips on Monday Oct 14th. Can you confirm that you have sent dips in both the original jersey quality UAAL01J, as well as new proposed quality FENKK00013?

Tu: Due to sourcing other options, we didn't continue to re-make lab dip for old quality UAAL01J. We just sent you lab dips for quality FENKK00013 that you prefer only.

Also, we sent you darkest black lab dip for TT-SJ30SX2-W120 core standard jersey. Please check it

**Seasonal Packaged Tank** - Noted that the saturation from FW24 is the darkest possible for original quality TTRIB2X2 240RIB. Will you be able to achieve a deeper saturation in the new proposed qualities BSL-294? Are you able to provide lab dips in this new quality and if so what would the eta be on these?

Tu: yes, we are proceeding lab dip for BSL-294 and ask supplier to make the darkest black for it. BSL-294 come from different supplier with TTRIB2X2 240RIB. Once received, we will check and send comparison photos for you. Plan to send lab dip is early of next week, we will keep you posted.

We really need all pieces of this puzzle before we can make a final decision. Pls note that our office is closed for a holiday on Monday, so I will review all elements with the team on Tuesday. However, it will be helpful to know the best possible XF date if we were to change qualities so that we can factor this into our decision.

Thank you for all of your efforts here and we look forward to receiving these.

Thank You and Best Regards

**Subject:** RE: Seasonal Packaged Tees + Seasonal Packaged Tank Top

Hey Jeni,

## Seasonal Packaged Tee

- As you can see, we had already begun Labdipping all Jersey qualities to be able to reduce any waiting and timelines on these, they will be sent out today.  
I have reached out to purchasing and will assess what is possible if we go with this selected quality, I am not confident we will be able to achieve the requested date 1/17 if we change to this quality but I will push our planning and purchasing to see what the best ex-factory is achievable.  
If maintaining the ex-factory is main priority, I suggest using FW24 Quality for 1<sup>st</sup> drop of Packaged Tees and move to new quality moving forward.

## Seasonal Packaged Tank –

- We will wait for your comments on this quality, it is the most accurate we can achieve and took an extended time to source as we needed to order a sample roll.

I do not believe that we have enough time to catch 1/17 if we continue to change the quality for this Drop 1. Once again, if we are prioritizing the ex-factory I suggest to stay with FW24 quality and move to the new quality in future drops.

We will await your review of both the White Labdip for Seasonal Package Tees as well as the overall review of the Packaged Tank Quality. If we can get confirmation on both of these and how we would like to proceed, I can see where we can improve, currently the safest way to ensure ex-factory is achieved with SGT inspection and all, is to revert to FW24 quality for this Drop.

The quality used for FW24 was the darkest saturation achievable as I have heard from my Purchasing team.

Please advise how you would like to proceed.

Cheers,

Thank you and Best Regards,

**Subject:** Re: Seasonal Packaged Tees + Seasonal Packaged Tank Top

Hi Tyler,

**Seasonal Packaged Tank** - We are still waiting to receive the proposed rib quality from you, it looks like this should arrive tomorrow.

**Seasonal Packaged Tee** - The team prefers the updated quality/saturation of FENKK00013 - see image below compared against the washed out saturation from SS24 bulk. We would like to see white lab dips in this same quality. We'll need to maintain 1/17 XF date, please urgently advise if this is possible.

Thank you,

Jeni

Hi Tyler,

Thank you for this information. I am reviewing all of this with the team, it looks like we should receive the proposed rib quality from you by Friday - I will confirm how to proceed for both qualities by the end of the week deadline.

Note that our biggest concern was the bulk color saturation of the black colorways for *both* qualities - will you be able to improve this if we keep with the current qualities in an effort to maintain XF? Can you prepare improved lab dips for our review or was what was achieved in SS24 (tee) and FW24 (tank) the darkest saturation possible in these qualities? Please also confirm if there is *any* way to achieve 1/17 XF if we choose to proceed with a new quality.

Thank you,

Jeni

Hey Jeni,

Hope all is well 😊

I am reaching out regarding the current status of the Packaged Tees + Tanks for NOS.

As we have not received confirmation on new quality of Jersey or Rib, we haven't been able to order bulk fabric for these styles and are unable to achieve the requested ex-factory of these Styles if ALD decide to change quality for the upcoming drop. We have 2 possible options for how to proceed based on the current development and production status.

Option 1: Using same fabric quality of FW24, Single Jersey 190GSM + Tank Rib 240GSM

- S/O need to be approved by 30<sup>th</sup> Nov
- Good will be ready on 17<sup>th</sup> Jan as needed.

Option 2: Using new Fabric and 1 round of Labdip for approval.

- S/O need to be approved by 6<sup>th</sup> Jan
- Good will be ready on 28<sup>th</sup> Feb

The new Qualities would need to be confirmed by the end of the week (11<sup>th</sup> of October) to be able to maintain close to option 2's ex-factory provided above.

New Jersey qualities were sent September 27<sup>th</sup>.

New Rib Qualities will be sent today as we needed to order a sample roll.

Our suggestion is Option 1 to maintain ex-factory for this 1<sup>st</sup> drop and to use FW24 Quality for both Tees + Tanks to hit ex-factory date. Continue to work on and ensure that we have sufficient time to perfect the new quality to your satisfaction and use in the future.

Please advise how you would like to proceed and if there are any issues, concerns, or questions about this. More than happy to help where possible.

Cheers,

Thank you and Best Regards,

**TYLER PRINCE**

**Subject:** Re: Seasonal Packaged Tees + Seasonal Packaged Tank Top

Hi Tyler,

Noted that you still have the Tee reference on hand, today I've sent out the Tank reference for hand feel and quality via DHL tracking # 3414404991

For white colorway, please follow these references. For black colorway it is important to achieve the darkest saturation possible.

Thank you,

Jeni

Hey Jeni,

Appreciate you moving this to an updated thread.

Noted on ALD's Comments and requirements for Seasonal Packaged Tee's and Tanks. Currently we do have the White Packaged Tee that was sent to us in July as a reference for handfeel, we have matched that and have one Option available for review for handfeel in white.(This color is not matching, currently only for quality/handfeel. If possible, please send any additional references you may have in your Package Tees & Tanks in both White & Black.

We will get the current Option we have available in front of your team while they are here so we can get a general direction on where to go from this stage, ideally the handfeel and quality is matching and we just need to now improve our colors with these styles.

Let me know if there are any issues or questions, also please let us know if you are able to send additional references.

Cheers,

Thank you and Best Regards,

**Subject:** Seasonal Packaged Tees + Seasonal Packaged Tank Top

**\*\*Moving this to its own thread**

Hi Tyler,

As previously discussed, it is important that we improve fabric quality/color saturation for both of the seasonal packaged styles going forward. Please help to submit fabric qualities for

hand feel approval as well as lab dips for color approval. Hand feel should follow the reference qualities that we sent you for FW24, please confirm that you still have these on hand.

**Black** - For both Tee and Tank styles - we need to achieve a richer black than what was previously shipped for SS24 and FW24, pls proceed to fabric quality swatches/lab dips for approval.

**White** - For both Tee and Tank styles - This will be our first time running this colorway with UA for this program, pls proceed to fabric quality swatches/lab dips for approval.

**Multi (Black/Navy/Heather Grey)** - For Tee style only - Black will follow the above comments of the all black pack to improve color saturation, Navy and Heather Grey color standards TBD, I will follow up as soon as these are confirmed on our end.

Please let us know if you have any questions and help to advise timing for improved quality/color swatches.

Thank you,

Jeni
