Notes

Amelia Bosgra 27 May 2025

Flagging Point A - chest

Point g - BK neck depth

Amelia Bosgra 27 May 2025 Updated by Amelia Bosgra 29 May 2025

Flagging Point C – Shoulder Breadth:

I've increased the shoulder breadth by 1cm from our standard spec to assess how it drapes on the body. While the submitted measurement is within tolerance, it is still 1.6cm under spec. This makes it difficult to evaluate whether the increased shoulder breadth improves the block for this fabric.

To help achieve more accurate results, I'll be reducing the tolerance to 0.7cm and kindly request that you aim to match the spec on all measurements as closely as possible, as this is the purpose of this fit sample.

I will be updating the same tol on points listed below due to same issue. Thank you!

Point A - Chest

Point B - Sweep

****Please note that the updated tolerances will apply to this fit sample only, as true measurements are required to accurately assess the block. These changes will not be reflected across all styles. Thank you!****
