#### COMMENT

12.5.24

#### CONSTRUCTION COMMENTS:

1. **Construction is incorrect, pocket should be a Cut & sew single welt pocket**, it is currently an onseam pocket, please correct this.

#### FITTING COMMENTS:

1. Keep neck width as per sample
2. Keep front neck drop as per sample
3. bring back to spec on back neck drop measurement
4. Bring back to spec on collar measurement at outer edge measurement
5. Bring back to spec on bicep measurement

6. bring back to spec on sleeve opening measurements								
7. bring back to spec on welt width measurement								
8. Ensure all measurements are brought back to spec.								
<b>WORKMANSHIP COMMENTS:</b>								
1. Please add tricot fusing to collar, the weight of the fusing should be light and compatible to fabric. Please add in if this is workable								
2. Please make mock up of collar facing, the CF neck is too bulky and is affecting the overall appearance of the garment and we want to check other alternatives to ensure we can improve this								
3. Rib seam is very bulky, is there anyway we can improve this? Can the rib seam be pressed open and tacked before joining on to garment?								
4. There is still alot of puckering at the collar and seams, please ensure that this is improved. Please check stitch tension and improve thread quality to improve persistent puckering. See photos below.
